SUMMARY

Flutter developer with **1.5+ years of hands-on experience** building real-time, production-grade mobile apps. I enjoy taking on complex features from start to finish, whether that means wiring up live tracking, integrating payments, or building smooth animated UIs. I care about writing clean, stable code and I keep pushing to get better at what I do.

EXPERIENCE

Apifiny

Aug 2025 – Dec 2025

Flutter Developer

Islamabad, Pakistan (Onsite)

- Joined the team building an **AI-powered Muslim dating app**, working on onboarding flows and polished, responsive UI in a collaborative setup
- Worked closely with Firebase services Auth, Firestore, Storage, Cloud Functions, and Messaging to keep the app stable and fast
- Helped ship AI-driven features like **face liveness verification**, and jumped in to fix real-world backend and UI issues as they came up

ITShifts

Jan 2026 – Present

Flutter Developer

Islamabad, Pakistan (Onsite)

- Worked across several client projects, stepping in wherever the team needed help to hit deadlines without cutting corners on quality
- Teamed up with backend developers in a fast-paced environment and built features under real pressure, **real-time systems, payment integrations, localization, and withdrawal flows**
- Took ownership of complex tasks end-to-end and adapted quickly when project requirements shifted

PROJECTS

Genie | AI-Powered Muslim Dating App

- Built the full user journey from scratch, multi-step onboarding, profile setup, location-based discovery, like and super-like actions, and **automatic match generation** when both users like each other
- Added an **AI Genie assistant** that works in both text and voice, using Cloud Functions and OpenAI, with multilingual responses and persistent conversation history
- Shipped trust and safety features including **face liveness verification**, user blocking and reporting, and subscription-based gating

Seyanti | Three-Sided On-Demand Service Platform

- Built three separate Flutter apps for the same platform, one for customers booking services, one for agencies managing operations, and one for providers executing jobs in the field
- Implemented **live provider tracking on Google Maps** with real-time location sharing, route polylines, and online/offline state synced to the backend
- Integrated the **Fawaterak payment gateway** for wallet top-ups and booking payments, and built a **role-based withdrawal system** covering bank transfers, Vodafone Cash, and Instapay
- Delivered real-time in-app chat with text, images, and video across all three roles, plus **push notifications** and multi-language support (English and Arabic)

EDUCATION

Virtual University of Pakistan

Bachelor of Science in Computer Science
